-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 27-29, drawn to a method for providing indicators regarding the position of one or more below ground facilities, classified in class 116, subclass 200.
 - II. Claims 30-32, drawn to a method for facilitating installation of geocomposites, classified in class 405, subclass 302.4.
 - III. Claims 33-36, drawn to a method for shielding selected land surfaces from thermal gain or dessication, classified in class 160, subclass 19.
 - IV. Claims 37 and 38, drawn to a method for repelling one or more species from selected land surfaces, classified in class 424, subclass 405.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different method inventions have different modes of operation, difference functions or different effects. For example, Group I installs colored portions of geocomposite in proximity to below ground facilities to show the presence of the facilities, Group II provides instructions adapted and arranged to show the relative placement of one or more segments of

geofabrics with respect to one another, Group III provides a geofabric in a form that reflects a significant portion of ultraviolet light and other heat-producing radiation that strikes them and Group IV positions a layer of geofabric on a land surface wherein the layer has a color that is aposematic to the species sought to be repelled.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Gary Shaffer on September 9, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lisa M. Saldano whose telephone number is 703-605-1167. The examiner can normally be reached on Monday-Friday, 8:30am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather C. Shackelford can be reached on 703-308-2978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
